SUMMARY

- MCA student at IIIT Bhopal building full-stack applications on the **MERN stack** with hands-on experience integrating **AI/LLM APIs** (OpenAI, OpenRouter) into production-style projects. Comfortable across the stack – REST API design, authentication systems, and database modeling – with a growing focus on applied AI features. Seeking a **Full-Stack Developer / SDE** fresher role to build scalable, user-focused products.

EDUCATION

Masters of Computer Applications (MCA)

July 2024 – Active

Indian Institute of Information Technology, Bhopal

Bachelor of Science, Computer Science (BSc)

May 2020 – June 2023

Govt. Holkar (Model Autonomous) Science College, Indore, MP

CERTIFICATES & ACHIEVEMENTS

- **Craft Precise Prompts for AI Models** – [IBM SkillsBuild](#), Issued Jul 2026
- Strengthened problem-solving and **DSA** skills by solving **200+ coding problems** across **LeetCode** and **GeeksforGeeks**.
- **AIR 945** in **NIMCET** (NIT MCA Common Entrance Test), June 2023.
- **92.5 Percentile** in **MAH-CET** (Maharashtra Common Entrance Test), March 2023.
- **90 Percentile** in **KIITEE** (KIIT Entrance Exam), March 2023.

TECHNICAL SKILLS

Programming Languages: C, C++, Java (Basic), Python, HTML, CSS, JavaScript

Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js), Bootstrap

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Oracle SQL Developer

Core CS Concepts: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, DBMS

PROJECTS

SpeakScore.AI | React, Node.js, Express.js, MongoDB, OpenRouter API

🐙 [GitHub](#) | 🖥 [Live Demo](#)

- Built an AI-powered mock interview platform that parses uploaded resumes with **pdfjs-dist** and **GPT-4o-mini** in under **5 seconds**, auto-generating role-specific questions across **2 interview modes** – **HR and Technical**.
- Designed real-time voice-synchronized AI avatars using the **Web Speech API** for speech-to-text responses and natural voice question delivery.
- Developed an instant AI evaluation engine that scores candidates on confidence, communication, and correctness immediately after each response, cutting manual interview-prep effort by an estimated **60–70%**, with a **Recharts**-based analytics dashboard and **jsPDF** report export.
- Integrated **Firebase Google Authentication**, JWT-based session handling, and a **Razorpay** payment gateway for a credit-based subscription system.

TaskFlow | React.js, Node.js, Express.js, MongoDB, JWT

🐙 [GitHub](#)

- Built a full-stack **MERN** task management app with dynamic task creation, checklists, and real-time status tracking.
- Implemented secure **JWT-based authentication** and multi-user collaboration with role-based task assignment.
- Designed **RESTful APIs** connecting frontend and backend, enabling real-time updates across a responsive, mobile-friendly dashboard.

Spotify Clone | HTML, CSS, JavaScript

🐙 [GitHub](#)

- Built a fully responsive music streaming UI replicating core **Spotify** functionality, including playlist browsing and a functional playback bar.
- Implemented song management and playback logic in vanilla **JavaScript**, ensuring smooth interaction across devices.
- Designed a consistent, responsive layout using **HTML** and **CSS** with no external frameworks.
